

Consolidated Contact Info and New Core Option

The global leader in
door opening solutions

January 10, 2018

Consolidated Contact Info:

ASSA ABLOY Wood Doors has established new email addresses for quotes, ordering and customer service inquiries. Utilizing the following email addresses will result in the quickest response and ensure your request is in queue:

- Quote.wooddoors@assaabloy.com
- Order.wooddoors@assaabloy.com
- Customerservice.wooddoors@assaabloy.com

Although you can continue to use a direct contact's email address, the consolidated customer service email is automatically routed to the correct contact and will ensure receipt if someone is out of the office. ASSA ABLOY Wood Doors will no longer be accepting orders via fax.

New Core Option:

Response Engineered Core (REC) is now available for specific 45 minute fire rated flush wood doors. This core will replace the agrifiber core option when blocking is required. This change will happen internally with no need for any notes or adjustments in how you order your doors. The associated technical page in the ASSA ABLOY Wood Door Technical Manual has been updated accordingly.

If you have any questions, please contact your ASSA ABLOY Wood Doors Customer Service Professional or your local ASSA ABLOY Door Security Solutions Representative.
