## Elimination of Intumescent in 20-Minute Positive Pressure Fire Doors

December 6, 2017

Masonite Architectural Wood Doors is pleased to announce enhancements to their 20 minute fire rated offering for Graham Flush Wood Doors. 20 Minute fire rated doors can now be provided with no seals or intumescent up to a 3070 single opening or a 6070 standard/double egress pair opening. Customers do not need to do anything differently when ordering, all necessary coordination will take place within the factory. 20 Minute fire rated doors can be ordered using particleboard (PC), agrifiber (AF/AP) or engineered composite (EC) core. All other fire rated listings remain unchanged. Please contact your customer service representative for any questions or for more information.

Note: Where required by Code, Listed Category H gasketing is required in smoke and draft control applications.
